

Hospi Vista

Essential insights into Latin American hospitals

PROFILE OF:
HOSPITAL ARCO IRIS S.R.L.

Welcome

Global Health Intelligence (GHI) is the creator of HospiScope, the world's largest database of Latin American hospitals, featuring more than 140 data points for over 18,000 hospitals in 17 countries. HospiScope data — constantly updated through direct verification — is what powers HospiVista.

Beyond HospiVista, GHI offers a range of other solutions designed to deliver data and analysis for healthcare professionals focused on Latin America. These include:

SurgiScope: A database of medical procedures performed in Latin American hospitals that serves as a tool to gauge market demand for device, pharma and medical equipment manufacturers. SurgiScope is also used by hospital administrators in LatAm as a benchmarking resource.

ShareScope: Detailed data on market size/share for a wide range of medical equipment and devices across the region that's designed to give manufacturers an accurate picture of the competitive marketplace.

In-Scope: Customized research to help device and equipment manufacturers gain a more thorough, granular understanding of the marketplace, as well as competitive intelligence to help them counteract competitors successfully.

About the Data in the HospiVista Report

The data in this report is collected through an extensive outreach process conducted by a team of health research representatives who directly verify the information with each hospital.

Disclaimer

The information provided in this HospiVista report is provided without warranties of any kind, whether express or implied, including, but not limited to, implied warranties of success, quality for a particular purpose, non-infringement or course of performance.

Users of HospiVista hereby acknowledge and agree to perform their own due diligence in order to come to well-informed decisions of their own. The users hereby acknowledge that HospiVista data may possibly be used as an instrument in making such a decision, but should not be viewed as an authoritative end-all to any evaluations. GHI cannot be held responsible for any choices that individuals make regarding their care based on this data, not any business decisions made based on this data.

GHI is not responsible for the accuracy of the information provided nor legally liable should any of it prove to be incorrect. This applies to a HospiVista report generated for any hospital, clinic, medical center or any other type of healthcare facility.

In certain instances, hospitals may refuse to divulge data or may not be able to supply the requested data. In such cases, these gaps are indicated in the report with "*Without information*" written next to the data point. In rare cases, a given hospital report may have more than 50% of its information fields listed as *Without information*. In such cases, users may contact us at info@hospivista.com to address this concern.
